

PRA-538S

Mounting Dynamic Microphones for Conference

Description

PRA-538 is a gooseneck microphone for conferences. With a miniature dynamic super-cardioid capsule, a tailored frequency response and an excellent directivity, it is an ideal candidate for the miking and reinforcement in places such as: station, dock, airport, meeting, conference and lectures.

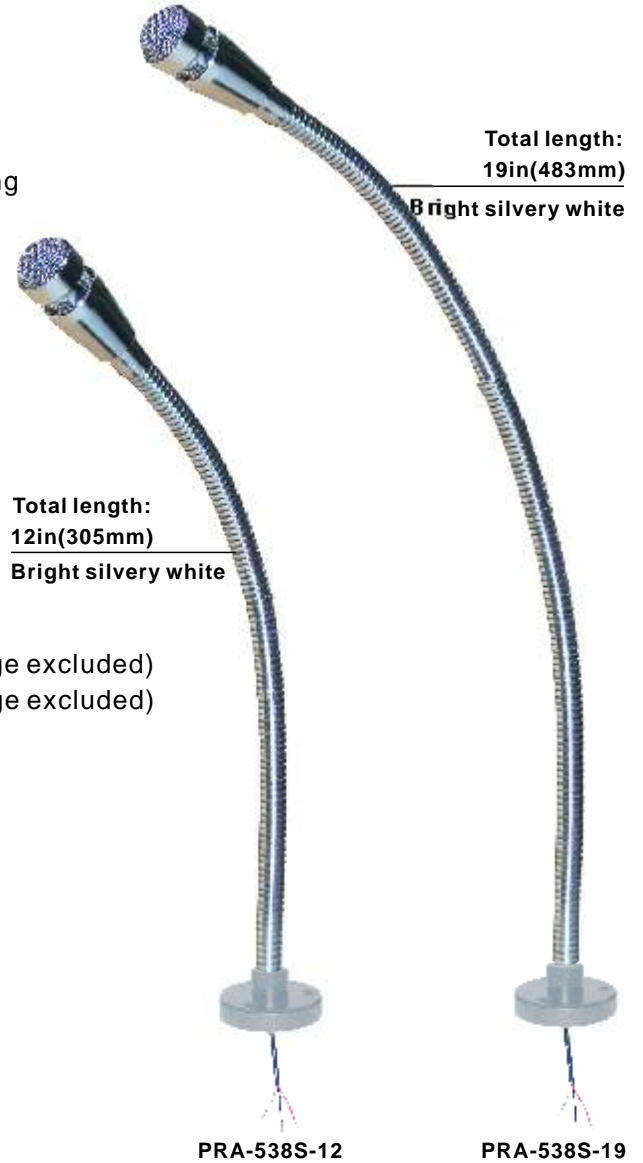

With three self-tapping screws pulling through the holes on the flange, the microphone can be safely installed on the connecting place.

Features

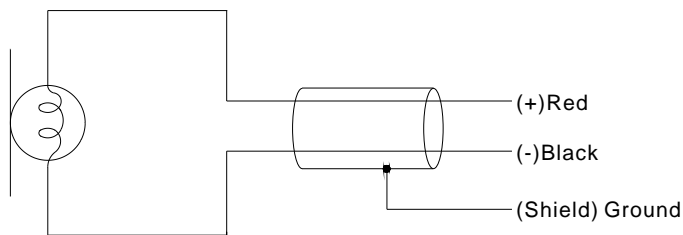

- Tailored frequency response to improve the crispness of miking
- Reliable, sturdy and nice appearance
- Excellent control on feedback
- Foam windshield for anti-POP
- Two lengths of gooseneck for alternation, easy to change

Specifications

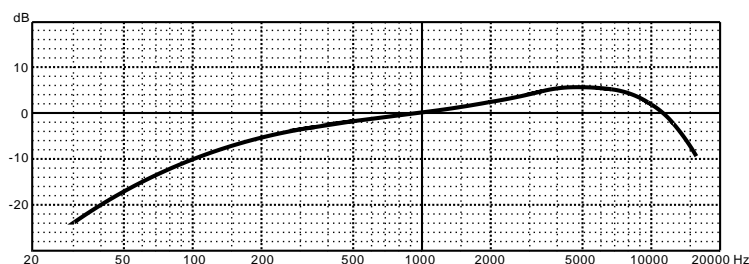

- Type: Dynamic conference microphone
- Polar Pattern: SuperCardioid
- Frequency Response: 100~15000Hz
- Sensitivity: -58dBV/pa (1.3mv/pa)
- Rated Impedance: 500
- Dimensions: PRA-538-12 32(head)x305mm (flange excluded)
PRA-538-19 32(head)x483mm (flange excluded)
- Net Weight: PRA-538-12 500g; PRA-538-19 550g
